ArAS Members activities

The first step for Kuwait to access the space domain and benefit from space technologies is developing a space capacity building program that focuses on the youth.

For that purpose, the team of **Dr Hala AlJassar**, ArAS Board member in charge of Education Development, from Kuwait University started the First KuwaitSat-1 capacity building project in 2019 and it is expected to be launched in the summer of year 2022. This is the first National space mission in Kuwait in which other national government sectors are collaborating with Kuwait University in this space mission. The project objective is to train students and to provide the basic infrastructure to facilitate the design, assembling, testing and operational capabilities for future space missions. More information in this [link](#) .

Attarik Foundation presided by **Pr. Hassna Chenaoui** announces the inauguration of the Museum-Exhibition "Meteorites: Sky Messengers " Expo by ATTARIK Foundation from June 30, 2021.

The date of June 30 coincides with the celebration of the International Asteroid Day.
